विषय -हिंदी

दिए गए गद्यांश को पढ़कर प्रश्नों के उत्तर दीजिए --

चने जोर गरम और अनारदाने का चूर्ण! हाँ, चने जोर गरम की पुड़िया जो तब थी, वह अब भी नजर आती है। पुराने कागजों से बनाई हुई इस पुड़िया में निरा हाथ का कमाल है। नीचे से तिरछी लपेटते हुए ऊपर से इतनी चौड़ी कि चने आसानी से हथेली पर पहुँच जाएँ। एक वक्त था जब फ़िल्म का गाना-चना जोर गरम बाबू में लाया मजेदार, चना जोर गरम-यह गाना उन दिनों स्कूल के हर बच्चे को आता था।

कुछ बच्चे पुड़िया पर तेज मसाला बुरकवाते। पूरा गिरजा मैदान घूमने तक यह पुड़िया चलती। एक-एक चना-पापड़ी मुँह में डालने और कदम उठाने में एक खास ही लय-रफतार थी।

दिए गए प्रश्नों के उत्तर गद्यांश के आधार पर लिखिए -

- (क) लेखिका को अपने बचपन की कौन-सी बातें आज भी याद आती हैं?
- (ख) पुड़िया किस चीज से बनाई जाती थी?
- (ग) पुड़िया की क्या विशेषता थी?
- (घ) फ़िल्म का कौन-सा गाना बच्चों में लोकप्रिय हो गया था?
- (ङ) पूरा गिरजा मैदान घूमने पर भी क्या खत्म नहीं होती थी?

Home assignment

Class -6

Read the passage carefully and answer the following question-

Living on the earth is rather like being at the bottom of a sea hundred of miles deep. Without the atmosphere, there would be no people for animals, birds or fishes, trees or plants. There would be no weather, winds or rain and there would be no blue sky , no Rosy sunsets or dawns. Fire would be impossible without air, for burning is the union of oxygen with whatever is burned. Nor would there be any noise, which is the vibration of air waves against our ear drums.

By day the atmosphere serves as a great sun-shade. It protects the earth from the full force of the sun by absorbing most of its harmful radiation. But for the atmosphere the daytime temperature would rise to 230 degree F; hotter than boiling water. By night, the air act like a giant greenhouse. It imprisons the heat collected during the day and prevents it from spreading into space. Otherwise, the temperature at night would plunge to -300 degrees F; far colder than we could stand.

Finally, the atmosphere catches and burns up, by friction, practically all the million meteors that fall each day from outer space into the earth's field of gravity. If all these meteors actually landed here, the Earth's surface would be

pitted and dented like the face of the moon, which has no atmosphere to stop them.

- (1) Write any two ways in which air protect us ?
- (2) What serves as a great Sun shade?
- (3) What is the process of burning?
- (4) How is living on the earth is like?

HOME ASSIGNMENT

CLASS-6

SUBJECT-ENGLISH

Q. Read the following passage and answer the following questions below-

We must do all we can to stop conflicts and civil war. Most conflicts happen in poor countries, especially which are badly governed or where power and wealth are not distributed fairly between different tribal or religious groups. So the best way to check fighting is to make a political arrangement in which all groups have their representatives. The need is to ensure human rights and economic development of all.

The next fundamental freedom is one that is not mentioned in the UN charter. In 1945, the leaders could not imagine that such a situation would arise. That is the freedom of future generations to live on this planet.

Even now many of us have not understood its importance. We are using up the limited resources for our present use. We are over using and even wasting them. We are, in fact, robbing our children of their right to live.

We must preserve our forests, fisheries and wildlife. All of these are collapsing because of our own habit of consuming or destroying them.

Questions:

Q.1 Answer the following questions briefly:

- (a) Why do most conflicts happen in poor countries?
- (b) What is the best way to check conflicts?
- (c) What is meant by 'the freedom of future generations to live'?

(d) How are we robbing our children of their basic right?

(e) What must we preserve for our children?

Q.2 Find words from the passage that mean the same as

(a) fighting

(b) keep safely

(c) coming to end

class 6
